# **INTERNATIONAL KIKO GOAT ASSOCIATION, INC.**

**“Dedicated to the Kiko breed and the meat goat industry.”**

The International Kiko Goat Association (IKGA) was established to preserve and advance the Kiko breed.

The foundation bloodlines defined as the Kiko breed were developed and documented in New Zealand in the 1980's. The animals used to develop the Kiko breed were native New Zealand goats that exhibited enhanced growth, extreme hardiness and excellent meat production under harsh conditions. The characteristics of a quality Kiko are based on its **performance** rather than its **appearance**. The IKGA recognizes these original Kiko goat imports and their direct descendants as "fullblood" Kikos.

## IKGA MISSION STATEMENT

The IKGA appreciates the superior characteristics of the Kiko breed and the IKGA is dedicated to promoting the Kiko goat as the best production meat goat in the world. We believe that by working together, we can continue to improve the Kiko breed through the use of controlled scientific study and independent performance testing.

The IKGA is a member owned association and encourages **all** members to participate. Many opportunities are available for members :

IKGA Officer  
IKGA Board of Director  
IKGA Committees  
Kiko Fest Committees

## IKGA MEMBERSHIP BENEFITS

- Voluntary participation in the DNA program
- Right to vote on direction of IKGA
- Low membership fees
- Reduced registration/ transfer fees
