

DUE DATE ESTIMATOR

To determine a doe goat's due date, locate her month of breeding on the table below. Then, subtract the number in the far right column of the table from the day of the month she was bred. For example, your doe was bred on July 10. Reading across from July, you know she will kid in December. To find the specific estimated due date, subtract the 3 in the right hand column from the 10 in her breeding date: due date is December 7.

Month of Breeding	Month Due	Subtract from Breeding Date
July	December	3
August	January	3
September	February	3
October	March	1
November	April	1
December	May	1
January	June	1
February	July	0
March	August	3
April	September	3
May	October	3
June	November	3
